

關節開合功 Joint Opening and Closing Gong

This form is very unusual and is a more advanced form because it covers certain martial art movements from within Dayan Qigong. In history the Kunlun Dayan System had martial art skills which were developed, such Dayan Palm, Dayan Fist and Dayan Finger and Dayan Sword and even Cotton Spear. However, today most of what we practise concentrates more on the development of good health. Still, for both good health and good martial art skill, we need to take care of our joints. It is particularly good for problem areas in the waist, knees, ankles, shoulders, neck and elbows and regular practise of Joint Opening and Closing Gong can strengthen the bones, joints and tendons and help keep us flexible.
